

The Creator Economy's Infrastructure Problem

How Verza is building the Operating System creators never had

The Team Behind Verza

CEO & Founder

Serge Amouzou - Award-winning fintech entrepreneur with 15+ years of experience. Founded Verza, Datatrix (AI insights platform), and Delect (fintech for restaurant operations). Deep expertise in financial services innovation and scaling technology for independent professionals.

- I speak creator economy
- I've proven founder-market fit
- I'm ready to scale

COO

Nercy Escobedo - Financial systems and operations expert with 15+ years at Bloomberg, Morgan Stanley, and fintech startups. Led trading systems integration for 75+ accounts including Google, Apple, Wells Fargo, and BlackRock. Secured \$100M+ in funding, managed \$50M+ portfolios. BS Electrical/Computer Engineering, PMP certified.

Morgan Stanley
Bloomberg

Early backers

Ross Pomerantz - Stanford MBA, enterprise sales veteran, and creator of Corporate Bro (1M+ followers). Angel investor in Verza. Founder of Corp Capital angel syndicate.

Carlos Fraser - Enrolled Agent with 20+ years of tax expertise. Founder of Taxko, Inc., specializing in tax planning and wealth building for individuals and businesses. Early investor in Verza.

The Old Way: Creators Just Made Content

Content Was King: Creators focused purely on making videos, posts, and art. Business operations were an afterthought.

Brands Controlled Distribution: Traditional advertising ruled. Creators were hobbyists or talent managed by agencies.

Simple Monetization: Ad revenue, sponsorships handled by managers. No complex campaign operations to manage.

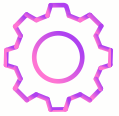

What Changed: Marketing Became Creator-Led

The power dynamic flipped. Brands realized creators drive better ROI than traditional ads. Marketing budgets shifted to creator partnerships. Suddenly, creators weren't just making content—they were running full marketing campaigns, managing brand relationships, and operating like media companies.

By 2024, 75% of brands allocated budget to creator partnerships. The creator became the agency.

The Problem: Working with Creators at Scale is Broken

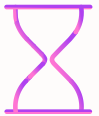

No Campaign Visibility

Brands juggle dozens of creators across DMs, emails, and spreadsheets. There's no single source of truth for what's live, what's late, or what's performing.

Slow, Manual Payments

Paying creators is a compliance and AP nightmare. Tax compliance, contracts, and invoices pile up. Creators wait 60+ days and disengage.

No Way to Vet at Scale

Brands have no reliable system to identify which creators will actually deliver. Gut feel doesn't scale.

How Verza Works for Brands & Agencies

What You Get

One Campaign Vault

Fund once. Verza handles all creator payouts, tax compliance, and contracts automatically.

Campaign OS

Track every creator, deliverable, and deadline in one place. No more spreadsheet chaos.

Instant Creator Payments

Approve a deliverable, creator gets paid immediately. Net-60 becomes Net-Now.

AI-Powered Creator Vetting

Verza Score tests creator performance before big dollars move. Only the right creators make the cut.

Real Results

Center for AI Safety \$125K campaign launched with top technical YouTubers. Verza handled all tax compliance, contracts, and triggered instant payouts on approval. Zero AP friction.

AO Sports Agency Reduced payment processing time by 40% and saved 100+ hours/month by running creator contracts and payouts through Verza.

The Verza Product Suite

Optic — AI Creator Discovery

A standalone SaaS product that surfaces and pre-vets relevant creators so brands fill campaigns faster. Tiered subscription: ~\$1,499/mo (1,000 leads/mo) up to \$4,200/mo (3,500 leads/mo), with usage-based top-ups at \$500 per 250 leads.

AI-powered discovery across platforms — find the right creators before competitors do.

Pre-vetting built in — Verza Score filters out low-quality matches automatically.

Usage-based top-ups — scale lead volume on demand without changing your plan.

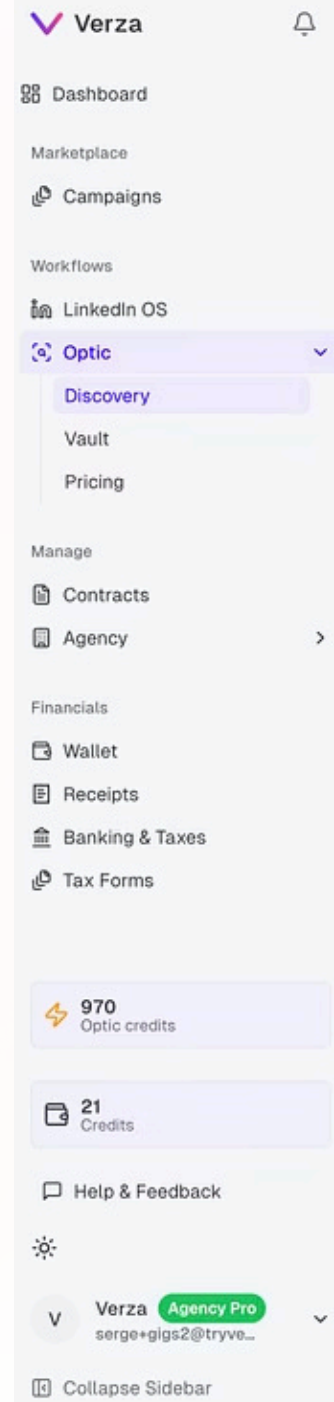

AI Studio

A credit-based asset generation tool for creating on-brand campaign images and videos at scale.

1 credit per image, 10 credits per video — simple, predictable pricing.

Sold in packs: \$15 / 250 credits or \$50 / 1,000 credits.

Generate campaign-ready visuals without leaving the Verza platform.

Verza Optic

Run small batches of creator discovery. When a batch is growing.

Verza

Verza is the operating system for the creator economy. We eliminate the complexity of creator discovery and payouts all within one u - Verza

Auto — pool all active campaigns

Creators per batch

10

Small batches finish faster and keep quality high. Run another batch from here or reply **CONTINUE** by text when you have alerts on.

The Campaign Marketplace: Where Capital Meets Creators

Verza acts as the central **Campaign Vault Engine**, seamlessly connecting capital with creative talent.

Enterprises Launch Campaigns

Institutions and brands fund a Verza Campaign Vault **once**, not per creator or campaign.

Verza handles **tax compliance** and clickwrap legal execution automatically, reducing compliance burden.

AI-powered creator vetting (**Verza Score**) ensures performance quality before any dollars move.

Example: Center for AI Safety launched a \$125K campaign in our pilot, illustrating real-world adoption.

Creators Get Matched & Paid Instantly

Creators are vetted via **Verza Score**, then matched to relevant, pre-funded campaigns.

Upon deliverable approval, funds are **released after the Verza Score threshold is met and the brand approves** — no invoicing required.

Net-60 payment terms become **"Net-Now"**, providing immediate liquidity for creators.

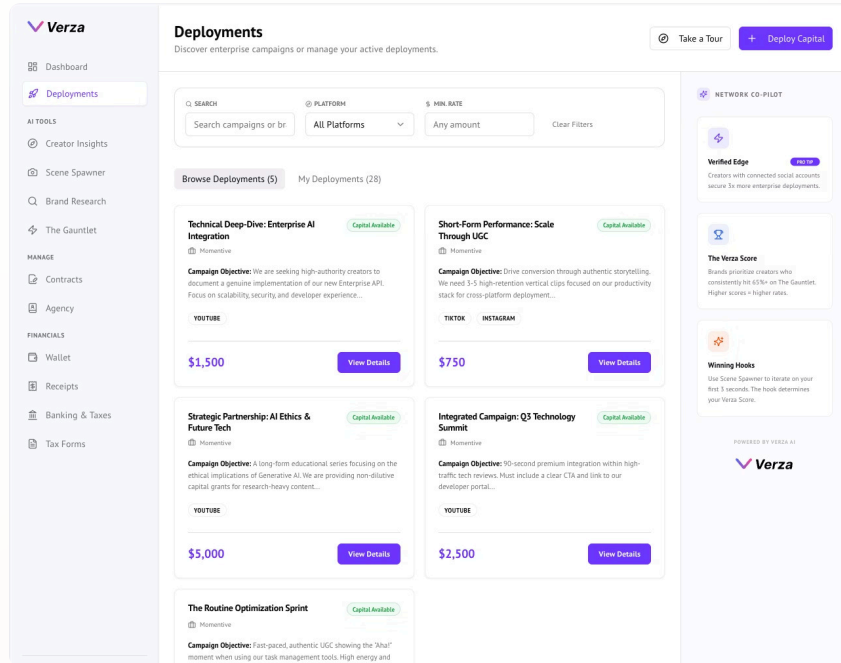

Verza Score serves as a **low-CAC acquisition channel** for high-quality, pre-qualified creators.

The Network Effect: A Powerful Flywheel

More enterprises launching campaigns attracts more vetted creators via Verza Score. In turn, a larger pool of pre-qualified creators builds greater enterprise trust in the platform. This virtuous cycle drives growth and increases capital flow. Verza captures a **15% take-rate** on all capital launched through Campaign Vaults.

The Infrastructure Layer: What We Actually Do

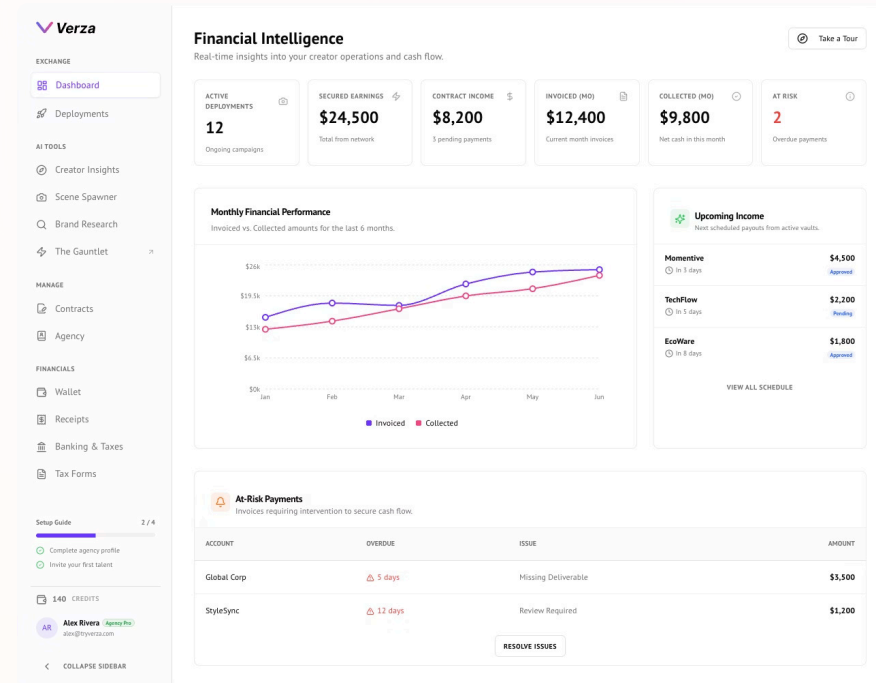

End-to-End Campaign Tracking

A system of record that agencies and creators have never truly had.

We're not trying to be a creator bank. We're building the Operating System the creator economy skipped.

Collections Mechanics at Scale

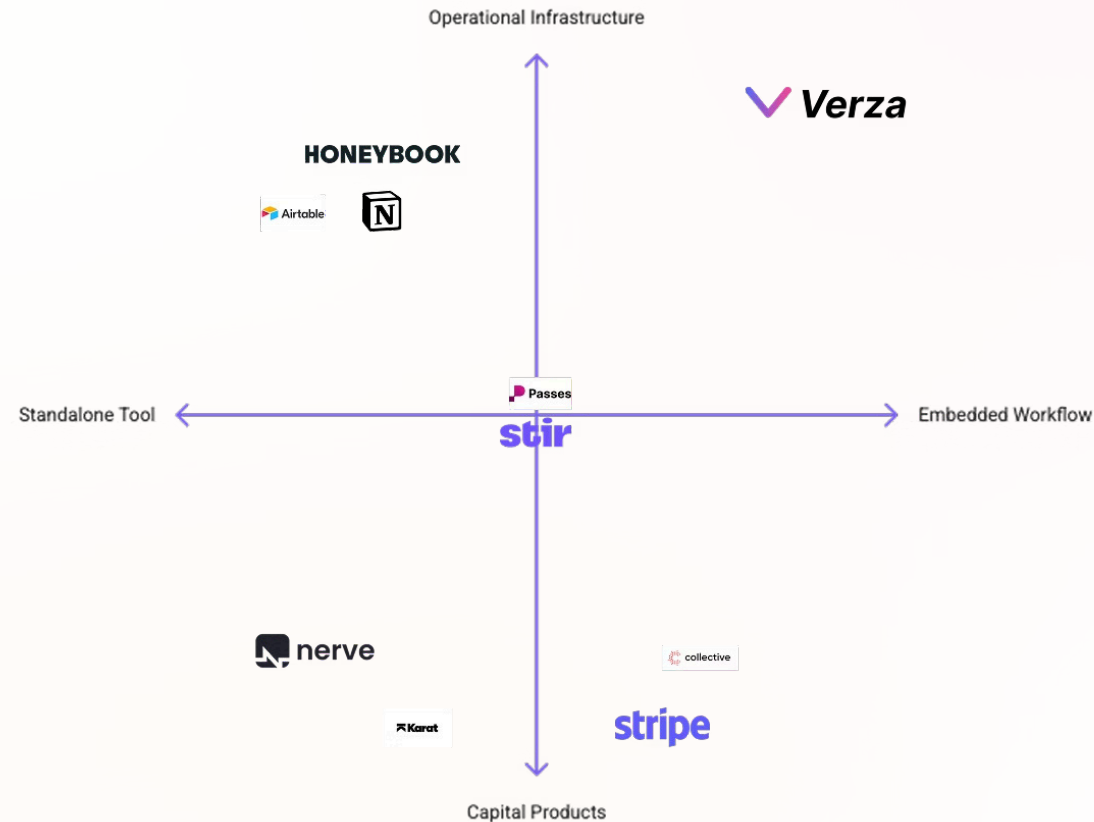

The essential operational follow-up work that individual creators can't consistently manage.

An abstract graphic on the left side of the slide. It features a metallic, reflective ring or loop. Several thick, flowing lines in shades of orange and red swirl around and through the ring, creating a sense of dynamic movement and energy. The background is a soft gradient of these warm colors.

Why Now: The Creator Economy Matured, But Infrastructure Didn't

The creator economy has rapidly matured, growing to **\$250B+** and giving rise to professional creators and sophisticated agencies. Yet, the essential operational infrastructure for managing this growth has remained stagnant, largely stuck in the era of DMs and spreadsheets. This glaring gap in specialized financial tools and operational support, where creators still face fragmented solutions, complex tax compliance burdens, and contract chaos, is precisely what Verza is built to fill. The window to establish the default Operating System for creators is *now*— before anyone else locks it up.

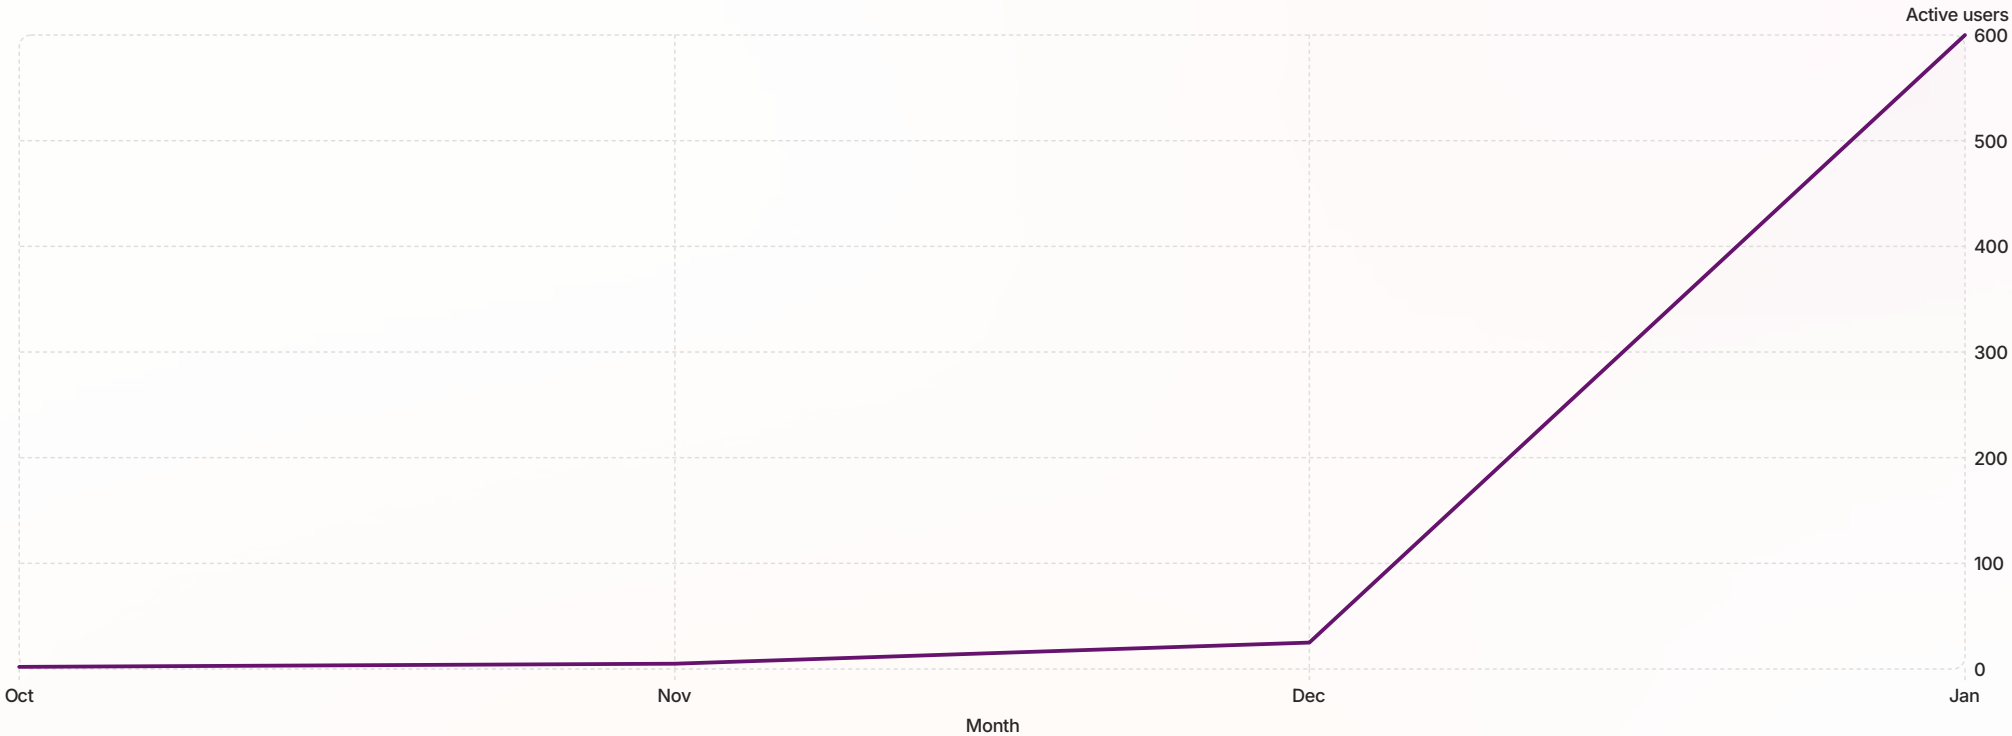

Competitive Landscape: Verza's Unique Position

- Verza uniquely owns the embedded operational infrastructure quadrant—not just a tool creators use sometimes, and not just capital. We're the system they work in every day.

Traction: The Infrastructure Is Working

Verza's proven platform is empowering growth, from individual creators to large-scale enterprise operations, demonstrating undeniable product-market fit and robust scaling capabilities.

Operational Backbone

Creators and agencies leverage Verza as their essential **operational backbone**, integrating seamlessly into daily workflows.

Streamlined Payments

We achieve payment compression without requiring brands to alter their existing Accounts Payable policies, focusing on **workflow efficiency**.

Efficient Acquisition

Our "Verza Score" program consistently attracts high-quality creators with a remarkably **low Customer Acquisition Cost (CAC)**.

Infrastructure, Not Lending

Our product-market fit is rooted in robust **workflow infrastructure** and operational excellence, not traditional financial products.

Top Creators are Already on Verza

“

J Johnson Jr (700K followers) - Elite Athlete & Creator

*"I was doing a batch order for my headphones (500 units). I was waiting for a creator payment and Verza got me paid in **14 days** so I can move forward with my business "*

”

“

AO Sports Agency

*"Using Verza for internal payouts and for contracts with sponsors, athletes and partners has reduced payment processing time **by 40% and saved over 100 hours per month**, streamlining our entire operation."*

”

Join the growing community of creators who've transformed their financial operations with Verza.

Our Vision

Building the Operational Backbone the Creator Economy Never Had

We're not building a creator bank. We're building the infrastructure layer that makes the creator economy work like a real industry — with systems of record, Campaign Vault collections, and AI-powered vetting that scales trust.

Business Model & Revenue Streams

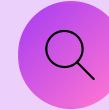

Marketplace Take-Rate

15% on creator payouts from funded Campaign Vault.

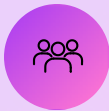

Invoicing Fees

1% when an agency workspace processes a contract invoice; 15% when a solo creator does, plus standard card processing.

Optic — AI Creator Discovery

SaaS tiers: ~\$1,499/mo (1,000 leads/mo) up to \$4,200/mo (3,500 leads/mo), with usage-based top-ups at \$500 per 250 leads.

Brand & Agency SaaS

Tiered subscription by creator roster size: ~\$167/mo (≤ 9 creators) to ~\$3,333/mo (≤ 500 creators).

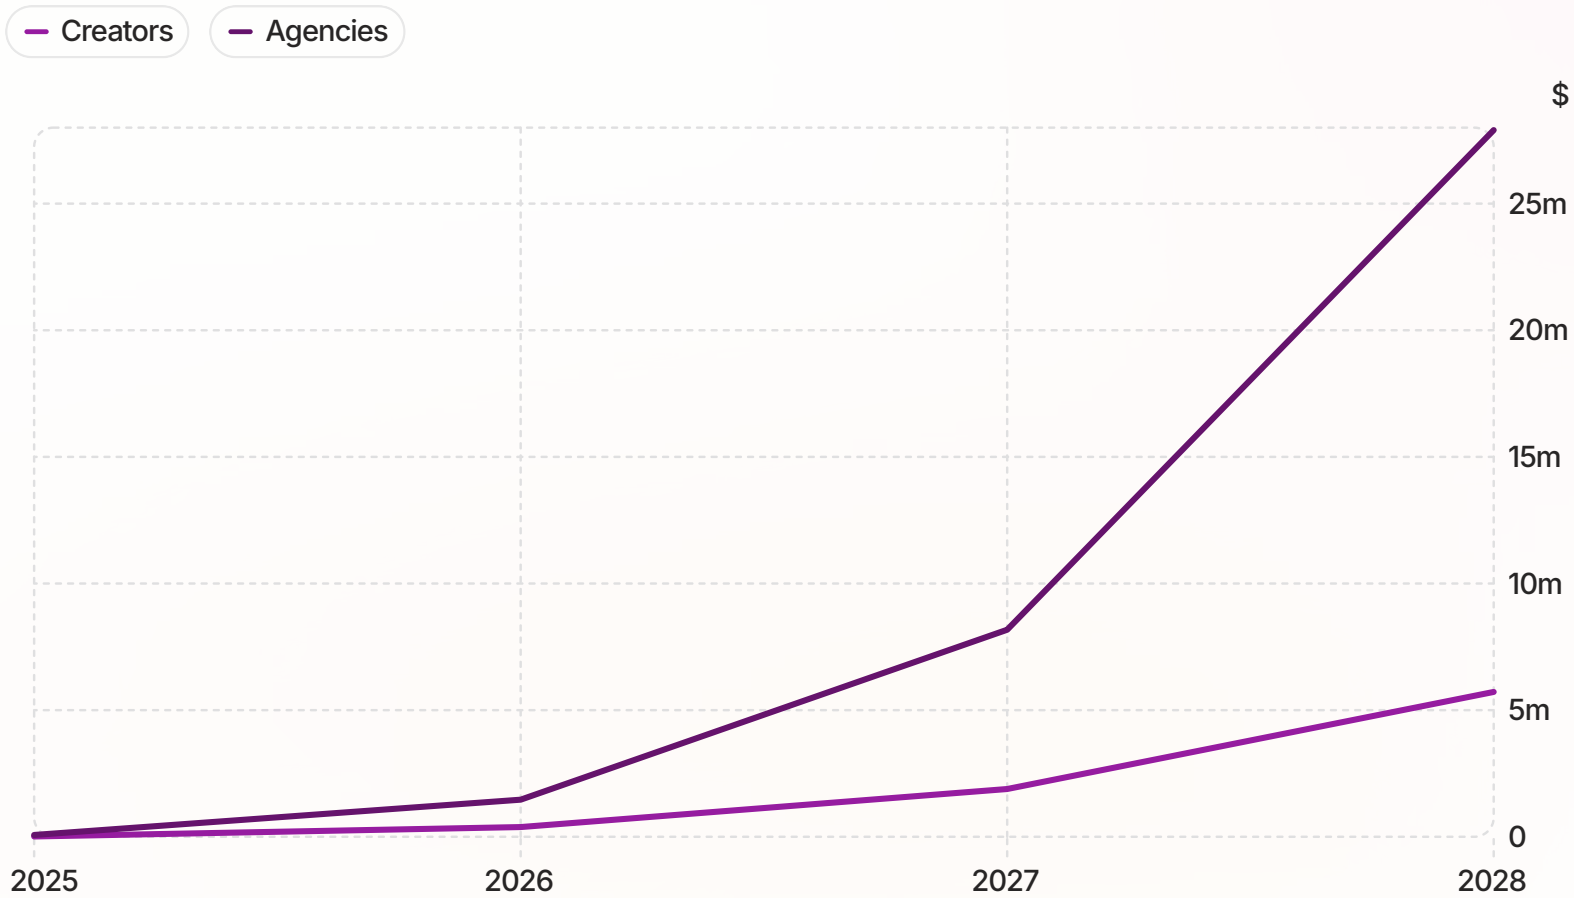

AI Studio

Credit-based asset generation — 1 credit/image, 10 credits/video. Sold in packs: \$15/250 credits, \$50/1,000 credits.

We monetize the workflows we already run — payments, discovery, software, and AI — not lending spreads.

Revenue Forecast

2025: \$54K Actual ARR Booked

2026-2028: \$18K ARR already booked in Jan, projected Growth based on a \$1M raise

Go-to-Market: Infrastructure-First Growth

1

The Verza Score (Product-Led Growth)

- Creators enter through high-frequency performance testing
- Useful tool first, infrastructure second
- Low CAC: they come for value, not paid ads

2

Agency Partnerships (B2B2C)

- Enterprise deals bring 100-500 creators per agency
- Examples: 100 creators via agency customer, 500 talents via AO Sports
- Agencies adopt Verza as their operational backbone

3

Network Effects (Embedded Workflow)

- Becomes system of record for daily operations
- High switching costs once embedded
- Users bring other creators—infrastructure compounds

Use of Funds: \$1M Pre-Seed Raise

\$1M Pre-Seed

1

Product Development - 40%

Accelerate AI infrastructure and core platform features (\$400K)

2

User Onboarding - 25%

Acquire and onboard first paying creators and agencies (\$250K)

3

Team Expansion - 25%

Hire key engineering and customer success talent (\$250K)

4

Market Validation - 10%

Prove product-market fit and prepare for Series A (\$100K)

This funding will position Verza as the definitive financial platform for the creator economy.

Join Us in Building Creator Infrastructure

- **Verza Score** vets creators with AI before money moves.
- Our Campaign Vault engine powers the **fund once** model, so brands pay securely up front.
- **Net-Now** payments and compliance automation keep tax compliance, contracts, and payouts moving.
